

Share your best ideas for recreation, tourism, and transportation along the Chinook Scenic Byway, SR 410.

Scenery, wildlife and recreation. Mountains, rivers, and great small towns. The region served by SR 410 is a great place to live and a great place to visit. A new plan for the Chinook Scenic Byway will be a roadmap for maintaining and improving the region for both residents and visitors.

Please join your neighbors and others that care about the future of the region to complete a plan for the byway. Your concerns and ideas can set priorities for management and identify potential projects for recreation, tourism, and stewardship.

The workshop will focus on several key questions to get the planning process going:

- What are the best places and activities along the byway?
- What do visitors need to have a more enjoyable trip along the byway?
- How can recreation along the byway work better for local communities?
- How can tourism improve quality of life and economic development?

Please join us at one of these upcoming public meetings:

- Naches Train Depot at 6:30 pm, Tuesday, October 15th
- Nile Clubhouse at 7:00 pm, Wednesday, October 16th
- Enumclaw Community/Senior Center- 6:30 pm, November 13th
